

ROPE SHOVEL TOOTH SYSTEM WITH IMPROVED STABILITY, OPTIMIZED LOCKING, AND ENHANCED PENETRATION

Succeeding the renowned STARMET ROPE SHOVELS system with even better performance and more user-friendliness.

GET DETECTION

Compatible with MTG's GET DETECTION system for real-time monitoring and immediate alarms in case of a GET detachment.

Benefits and Features

HIGHER PRODUCTIVITY

Slimmer, self-sharpening teeth with longer grooves along with a streamline wear cap and adapter design further improve the penetration capabilities optimizing your digging efficiency and reducing costs.

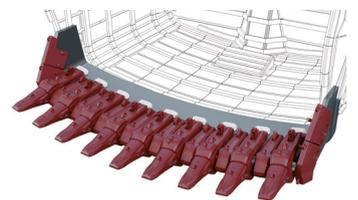

MAXIMUM RELIABILITY

The V-shaped fitting, an optimized locking, and reinforced adapter legs with weld-on bridges provide maximum stability and utmost resistance reducing plastic deformation and maximizing wear life.

SHORT AND SAFE DOWNTIME

Hammerless tooth and adapter lockings allow safe, quick and easy change-outs always from the top. An additional auto-tightening effect of the adapter locking reduces the need for maintenance and increases reliability.

WIDE RANGE

The modular and comprehensive product range offers versatile solutions that cover 90% of all possible rope shovel dipper configurations. The adapter variants are compatible with WH10*, WH12*, and wide radius lips.

Find Your Tooth Design

VEEMET ROPE SHOVELS				
TOOTH DESIGN	 STANDARD (RS)	 SHORT (RSS)	 EXTRA (RSX)	 PENETRATION (RSP)
PENETRATION	●●●○	●●○	●●○	●●●
ABRASION	●●○	●●○	●●●	●●○
IMPACT	●●●○	●●●●	●●●○	●○○○

Choose Your Adapter and Wear Cap Option

Compatible with standard WH10, WH12, and wide radius lips

PENETRATION ADAPTER (P)

- Versatile adapter option with an optimal balance between penetration and resistance.
- Compatible with conventional (CR) or hammerless ratchet (RH) adapter locking.
- It can be equipped with various wear caps (MP / MX or M360X) to also increase its resistance against high levels of abrasion.

M360X

HEAVY-DUTY ADAPTER (X)

- Especially designed for tough digging conditions with a high level of abrasion. A reinforced bottom leg provides additional wear material for longer wear life.
- Compatible with conventional (CR) or hammerless ratchet (RH) adapter locking.
- Can be equipped with the regular wear caps MP (Penetration) or MX (Heavy-duty).

MX / MP

VEEMET RS vs. STARMET RS – Upgrade Now!

VEEMET RS		STARMET RS	
Quick and easy 2-step assembly with acoustic locking confirmation	2	4	Double assembly steps without acoustic locking confirmation
V-shaped fitting with better load resistance	✓	✗	Simple load resistance
Reinforced pins and tooth integrated retainers	✓	✗	Pin and retainer to be assembled separately
Pin can be inserted from both sides and dual-pin option available for applications with high material compaction	✓	✗	Locking can only be mounted from one side and no dual-pin option available
5% slimmer nose with 80% more contact area	✓	✗	Less nose contact area
Self-sharpening tooth designs with longer grooves for better penetration	✓	✗	Self-sharpening tooth designs with shorter grooves
Both adapter versions available with bridges for additional stability and resistance	✓	✗	Only HD adapter version available with bridges
Centerline nose position and wear cap guides to improve adapter resistance	✓	✗	Adapters with nose position not in centerline and wear cap guides located in upper leg
New 360 wear cap options for protection of upper and lower adapter leg	✓	✗	Only regular wear cap options available
Compatible with MTG's GET DETECTION system	✓	✗	Not compatible with GET DETECTION
QR-code for product specific information	✓	✗	No QR-code available
